7th LANGENDORFF - Symposium

PROSTATE CANCER: DIAGNOSIS AND TREATMENT

Dear colleagues, Dear patients,

We feel honored to invite you to the 7th Langendorff Congress in the charming city of Freiburg!

The aim of the congress is to present new aspects in the evolving field of treatment in prostate cancer. The focus will be laid on functional and biological imaging, epigenetics and immunology, surgery and robotics, radiation therapy (adaptive radiation therapy, hypofractionation, protons and brachytherapy) and hormone ablative treatment.

Internationally renowned experts will emphasize the multidisciplinary components of our practice and their translation in the daily care of patients.

We would be glad to welcome you in Freiburg, where you can contribute to the success of our congress!

See you in Freiburg

Professor Anca-Ligia Grosu
Medical Director of the
Department for Radiation Oncology
University Medical Center Freiburg

Professor Ulrich Wetterauer
Medical Director of the
Department for Urology
University Medical Center Freiburg
