

Bank of Cyprus Oncology Centre

Consultant and Medical Director of Radiation Oncology

The Bank of Cyprus Oncology Centre (BOCOC) is located in Nicosia, Cyprus and was founded in 1998 by the Bank of Cyprus and the Cyprus Government.

The primary aim of the Centre is the diagnosis and treatment of all types of cancer, striving to achieve the best possible outcomes for our patients, by pursuing outstanding quality at all levels. In addition the Centre focuses on promoting and developing research and educational programs relating to the prevention and treatment of cancer.

Since 1998 the Centre has evolved into a 250 staff strong modern facility, with over 2000 patient contacts per year, remaining at the forefront of oncological services.

The Centre consists of three Clinical Departments:

- Medical Oncology
- Radiation Oncology
- Diagnostic and Interventional Radiology

The position:

The **Bank of Cyprus Oncology Centre** is seeking for exceptional candidates to apply for the position of **Medical Director of Radiation Oncology Department**.

The successful applicant will be a motivated individual with extensive experience in oncology and radiotherapy, coupled with excellent leadership and team organization skills. In addition, interest in research, teaching and staff training are essential for the post holder.

Principal Responsibilities

1. Provide clinical leadership for the radiotherapy and overseeing nuclear medicine department liaising with other clinicians, technicians and paramedical staff.
2. Manage the clinical workload of the departments to ensure that patients are diagnosed and treated promptly, appropriately and efficiently using an evidence based approach and following internationally accepted protocols.
3. Responsible for performance appraisal of staff in the Department.
4. Responsible for ensuring that all radiotherapy equipment are operated in a safe and accurate manner and that they are correctly maintained.
5. Administrations duties for smooth and efficient work for all staff in therapy, including consultant radiation oncologists and nuclear medicine, therapy and nuclear radiographers, resident medical staff and nurses.
6. Participate and encourage regular departmental clinical audit to ensure that all staff and team maintain excellent standards of care.
7. Promote research programmes both at local level as well as joining international research groups to develop an approach to caring for and treating patients based on clinical outcomes.
8. Participate and facilitate the participation of the department's staff in multidisciplinary meetings

9. Promote team based patient care both within the department and through strong bonds with the other departments
10. Participate in the promotion of cancer education for health professionals by organising educational courses, conferences, fellowship programmes and visits by external professionals.
11. Maintain continued professional development by keeping their knowledge updated through journals, attending conferences and courses, etc in order to ensure that the benefits of new cancer treatments are made available to the Centre's patients.
12. Work with the Chief Executive Officer in the development of links in clinical activity, research and education with outside collaborators in order to promote the development strategy of the Centre
